

JESSICA CHAVEZ

Full-Stack Software Engineer SaaS & Product Builder

Las Vegas, NV Open to Remote (US / Costa Rica) (702) 300-0112 jcsoftwareengineer369@gmail.com

[GitHub](#) · [Portfolio](#) · [LinkedIn](#)

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 5+ years building and shipping production grade SaaS platforms, ecommerce systems, and enterprise web applications. Experienced across the full product lifecycle from architecture and backend API design to UI/UX and cloud deployment. Founder level ownership: built and launched subscription platforms with Stripe billing, role based access, and third party integrations from the ground up. I am fluent in English and Spanish. Fully remote experienced and timezone flexible.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), React, Node.js, Express, Python, Django, TailwindCSS, HTML, CSS

Databases: MongoDB, PostgreSQL

Architecture: SaaS Architecture, REST APIs, Authentication & Authorization, Role-Based Access Control, Subscription Systems, Webhook Handling

Tools & Platforms: Stripe API, Git, Vercel, Render, AWS

PROFESSIONAL EXPERIENCE

Full-Stack Engineer & Founder

Pawfect Plug (SaaS Platform) *Las Vegas, NV (Remote) Jan 2024 – Present*

- ▶ Architected and launched a full-stack subscription SaaS platform on the MERN stack, including multi-tier billing logic using Stripe and secure webhook handling for real time event processing.
- ▶ Built a custom admin dashboard for product management, SKU control, affiliate tracking, and sales reporting reducing manual operations overhead.
- ▶ Integrated dropshipping and third-party APIs to automate product sourcing and order fulfillment workflows end to end.
- ▶ Sole owner of the full product lifecycle: system design, backend architecture, UI/UX, and production deployment via Vercel and Render.

Full-Stack Developer

Human Nature Athletica (HNA SaaS Platform)

Blue Diamond, NV (Remote) April 2024 – Jan 2025

- ▶ Developed enterprise web applications to streamline internal workflows, improving operational reporting accuracy through REST API integrations with internal and third-party systems.
- ▶ Built dynamic React dashboards and Node.js/Express backend services with secure authentication and role-based access controls.
- ▶ Led UI/UX improvements and system performance optimization, contributing to a measurable reduction in user friction.

Full-Stack Architect Engineer

Multi Vendor Ecommerce Market *Los Angeles, CA (Hybrid/Remote) July 2021 – Jan 2024*

- ▶ Designed and built a multi-vendor ecommerce SaaS platform, including React dashboards and Node.js/Express services handling shipping fulfillment automation.
- ▶ Integrated REST APIs for internal systems and third-party logistics providers, improving shipping accuracy and automation.
- ▶ Implemented authentication, role-based access controls, and brand/UX system across the platform.

Independent Full-Stack Developer

Freelance

Remote Ongoing

- ▶ Deliver production ready web applications with REST APIs, authentication flows, and third-party integrations for clients.
- ▶ Design responsive UIs using TailwindCSS and modern frontend best practices; deploy via Git workflows on Vercel, Render, and AWS.

PROJECT HIGHLIGHTS

Pawfect Plug Subscription SaaS Platform

- ▶ Full-stack MERN application with Stripe subscription billing, webhook automation, and admin + affiliate management system.
- ▶ Automated third-party API integrations for product fulfillment and inventory control.

Portfolio & Vendor Marketplace Platform

- ▶ Full-stack web application integrating ecommerce workflows, vendor management, and dynamic product listings.

Pura Vida Flow (Sound Healing App)

- ▶ Full-stack web application integrating sound healing workflows, user features and management, and dynamic product listings of products that align with self love essentials for the soul.

EDUCATION

Kenzie Academy (acquired by Southern New Hampshire University)

Front-End Engineering & Full-Stack Web Development Certificate

- ▶ JavaScript, React, Node.js, Express, MongoDB, Python, Django, PostgreSQL, HTML, CSS
- ▶ Agile development methodologies and team based software engineering

Independent Technical Study — Ongoing

- ▶ Advanced focus in SaaS architecture, API integrations, subscription systems, and cloud deployment.
